

## **LAUTENBERG CHEMICAL SAFETY ACT UPDATE**

**ISSUE/TOPIC:** What is the EPA status on Lautenberg Chemical Safety Act?

**BACKGROUND:**

- The EPA has met all the one-year implementation deadlines required by the Lautenberg Chemical Safety Act (LCSA).
- The new TSCA statute, and EPA's implementation, are grounded in a risk based approach (considering both hazard and exposure) that is supported by the scientific record that is consistent with the new scientific standards.
- The releases, on June 22, included three final framework rules, the first 10 scoping documents, and guidance for external parties interested in submitting risk evaluation to the EPA.
